# Aviro – Anti Viral & Anti bacterial Face mask with HeiQ Technology

---

## AVIRO

- A New Zealand owned and operated business. Offering a range of innovative anti-viral and anti-bacterial face masks and garments to help prevent the spread of dangerous germs through textile surfaces.
- Your business could be a key provider of AVIRO products as the nation prepares for what could be ongoing waves of lockdown.
- Every AVIRO garment, including face masks, has been engineered with HeiQ Viroblock NPJ03. This is a new Swiss textile technology designed to inhibit the presence and growth of bacteria and enveloped viruses, and is among the first in the world to be
- proven effective against SARS-CoV-2 (virus that causes COVID-19). HeiQ Viroblock has also proven effective against Influenza types H1N1, H5N1, H7N9, and Respiratory Syncytial Virus (RSV) and demonstrated significantly improved reduction of virus infectivity.

## **AVIRO FACE MASK**

### New Antiviral Technology Reusable Face Masks

Hundreds of face masks filter airborne particles but most aren't designed to target bacteria and viruses. Even when they do filter dangerous germs, the trapped microorganisms are still present on the mask and can remain active for days.

There is a risk that germs can be transferred by breathing and handling the mask or from surface to surface.

AVIRO face masks are different. They are engineered with HeiQ Viroblock, a technology that inhibits the presence and growth of bacteria and viruses on fabric, creating a germ resistant surface.

### **Product Details**

- Sustainable alternative to single use face masks. Made with fabric which have been independently tested and has passed.
- Our face masks feature three layers - 1 non-woven fliter and 2 layers of viroblock.- Offers anti-viral and bacterial protection.
- Is competitively priced - we understand your customers have a budget so we have worked hard to match the price points of similar products without HeiQ Viroblock technology.
- Moisture management, wicks moisture away from the body. Treated with HeiQ Viroblock for antimicrobial protection (bacteria and virus resistant).
- Usinglightweight high filament yarns for softness and comfort. for breathability comfort for all day wear.
- 
- HeiQ pure Antibacterial application, wash less as your Face masks and garments stay fresher for longer.

# About The Technology

---

- The Technology: Swiss based company HeiQ is a leader in textile innovation, creating some of the most effective textile technology on the market today. Their latest breakthrough is HeiQ Viro block, designed to deactivate the presence and growth of bacteria and enveloped viruses, such as coronavirus and influenza, on textile surfaces.
- **SO, HOW DOES IT WORK?**
- HeiQ Viroblock is an intelligent Swiss textile technology that is added to fabric during the final stage of the manufacturing process.
- It uses a unique combination of silver and vesicle technologies in a dual defence against dangerous pathogens:
- HeiQ vesicle technology: many viruses such as coronavirus and influenza are coated by a lipid (fatty) membrane that protects them. HeiQ vesicle
- technology targets the membrane surrounding the virus rapidly depleting the cholesterol from the viral envelope. This exposes the virus, deactivating and making it useless within minutes.
- HeiQ silver technology: Deactivates the replication of bacteria and deactivates viruses.

**Thank You**

A hand holding a red marker is shown underlining the words "Thank You" which are written in a bold, black, cursive font on a white background. The hand is positioned on the right side of the text, with the marker tip touching the end of the underline.
